

**Agriculture, Fisheries and Conservation Department**

Name: \_\_\_\_\_

Date: \_\_\_\_\_

1. Currently there are \_\_\_\_\_ Marine Parks and \_\_\_\_\_ Marine Reserve in Hong Kong.
2. What is the difference between Marine Park and Marine Reserve?
  - A. The level of protection of Marine Reserve is higher
  - B. No recreational activity is allowed in Marine Reserve
  - C. All of the above

3. Please match the following organisms/habitat with the relevant Marine Parks (Select one or more).

A. Coral community	B. Mangrove	C. Seaweed bed	D. Seagrass bed	E. Coral fish	F. Chinese White Dolphin
--------------------	-------------	----------------	-----------------	---------------	--------------------------

Map of Hong Kong showing six Marine Parks with their names in Chinese and English, and empty boxes for matching:

- Yan Chau Tong Marine Park (印洲塘海岸公園)
- Tung Ping Chau Marine Park (東平洲海岸公園)
- Sai Chau & Lung Kwu Chau Marine Park (沙洲及龍鼓洲海岸公園)
- Hoi Ha Wan Marine Park (海下灣海岸公園)
- The Brothers Marine Park (大小磨刀海岸公園)
- Unlabeled Marine Park (North-east)

4. Try to circle the below words from the letter puzzle.

**Coral, Rocky Shore, Coast, Lime Kiln, Mangrove, Seagrass, Beach, Jellyfish, Sea Urchin, Milky Mangrove, Reserve**

5. What is the importance between coral community and us? Let's find out from the following pictures.

			
Important habitat of marine organisms <input type="checkbox"/>	Filter and purify the industrial wastewater <input type="checkbox"/>	Allow us to enjoy the marine environment <input type="checkbox"/>	For the manufacture of valuable accessories <input type="checkbox"/>

6. Observe and record two marine organisms that you found at Hoi Ha, draw and name them in the following blocks.

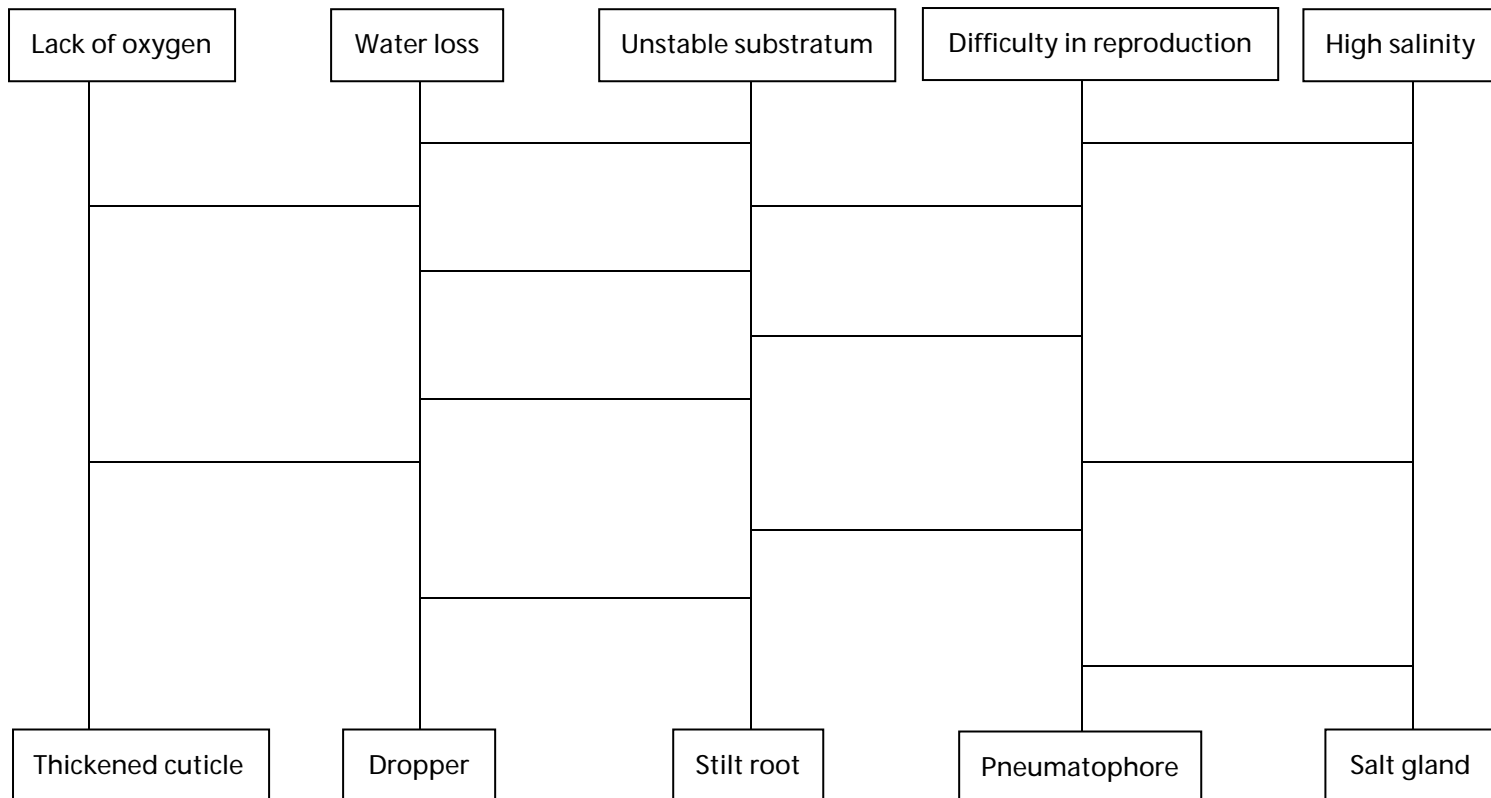

Name	Name

7. In the old days, people use \_\_\_\_\_ or \_\_\_\_\_ as raw materials for producing lime in the lime kiln.

8. Please circle the functions of lime in the old days from the followings.

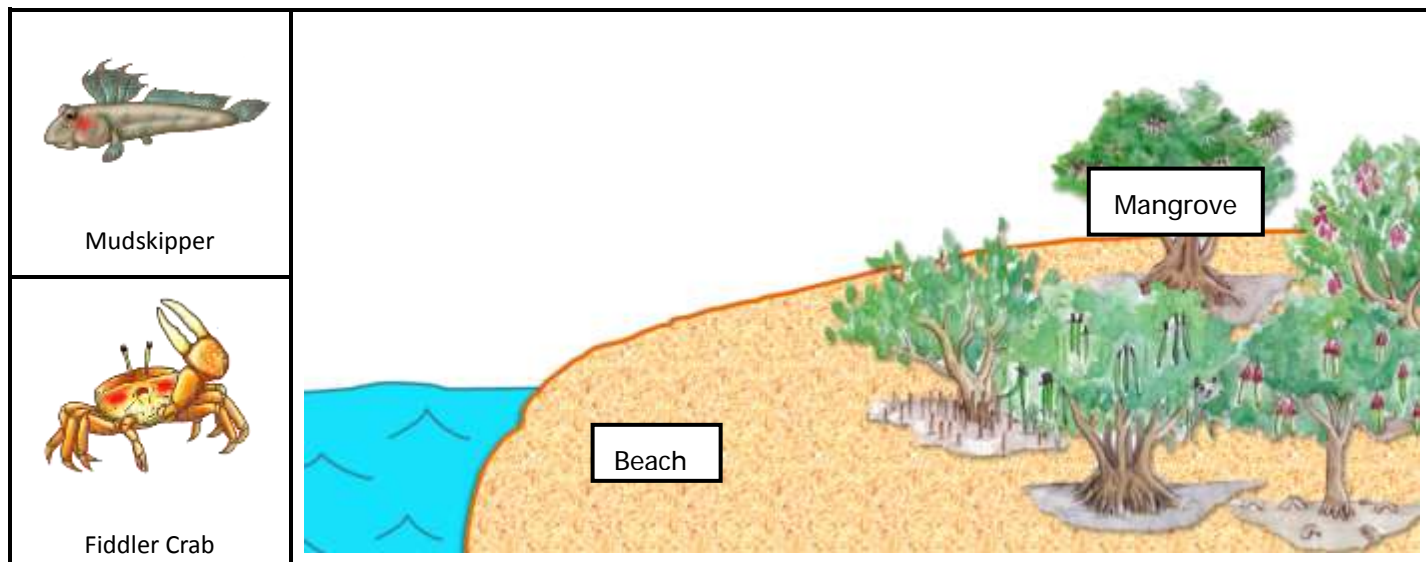

Aqueous solution	Neutralize the acidity of agricultural farm	Incense ash for religious purpose	Repairing material for vessels
Medical use	Food additive	Construction material	Desiccant

9. Mangroves face lots of challenges in their living environment, thus they process different adaptations for survival. Through the ladder game, you will find out the answers.

10. If you were the juveniles of the following marine organism, which location in the picture would you choose to stay? Use 'X' to indicate the location.

Why did you choose this location? \_\_\_\_\_

11. In order to protect marine and coastal environment and maintain the biodiversity, certain human activities are prohibited in marine parks, including:

			
<p>Littering</p> <p><input type="checkbox"/></p>	<p>Fishing (Without permit)</p> <p><input type="checkbox"/></p>	<p>Photographing</p> <p><input type="checkbox"/></p>	<p>Boating</p> <p><input type="checkbox"/></p>
			
<p>Stand on corals</p> <p><input type="checkbox"/></p>	<p>Take the marine organisms home to keep</p> <p><input type="checkbox"/></p>	<p>Pick or take away the wild organisms or their parts.</p> <p><input type="checkbox"/></p>	<p>Swimming or diving</p> <p><input type="checkbox"/></p>

**Think further**

- ⊙ Apart from designating Marine Parks and Marine Reserves, could you name any other possible conservation measures?
- ⊙ What can you do to conserve the important marine environment in your daily life?
