

# **Code for SCUBA divers and snorkellers to visit the coral sites**

- 1. When a small dive boat is used to transport divers to the coral sites,**
  - ♦ do not drive into too shallow water;
  - ♦ do not anchoring outside the designated anchoring area;
  - ♦ tie up the boat to the green mooring buoy provided if necessary;
  - ♦ diving boats should not pass over diving areas in radius of 15 meters from bubbles.
- 2. When diving in the water, do not touch, walk, sit or lain on the coral.**
- 3. Avoid SCUBA diving training on coral sites.**
- 4. For a SCUBA diver who cannot master good buoyancy control, he should avoid diving on the coral site, in particular the shallow coral site (less than 2 M). You can, however, dive along the periphery of the coral site in deeper waters.**
