

## **Importation/transshipment of pet food/animal feed to/via Hong Kong**

We have no objection to the importation/transshipment of pet food/animal feed to/via Hong Kong. No import permit will be issued by this Department for such purpose. However, if the products contain materials derived from ruminant and/or poultry origin, it is recommended that a veterinary certificate issued/endorsed by the relevant official veterinary authority of the Government in the country of export is required to accompany with the pet food/animal feed importing into Hong Kong to facilitate trade and re-export. Please find below some relevant certifications for the veterinary certificate for your information.

1. The ruminant animals from which the certified materials were derived were subjected to anti-mortem examination (inspected prior to slaughter), and were not found to show any evidence or clinical signs of any disease transmissible by the certified materials. These animals did not show any clinical signs of generalized central nervous system disease.
2. The feeding of ruminants with meat-and-bone meal and greaves derived from ruminants is banned in the country of production, and this ban is effectively enforced.

6. The certified materials of ruminant origin do not include any components of any carcass that was rejected during post-mortem examination as unfit for human consumption.
