

EXPORT CERTIFICATE
for the Re-entry of Hong Kong Resident Horses⁽⁵⁾ into Hong Kong
 - All the pages must be completed in English ⁽¹⁾ and must travel with the horse.
 Please tick the appropriate box to indicate the option chosen.

Special Permit No.: _____ Export Permit No. (if applicable): _____
 (issued by Hong Kong Government) (issued by _____ Government)

A Special Permit to import the horse must be obtained before export.

For details see

www.afcd.gov.hk/english/quarantine/qua_ie/qua_ie_ipab/qua_ie_ipab_ihea/qua_ie_ipab_ihea.html

SECTION I IDENTIFICATION

This information can be contained in a separate schedule or further rows can be added as required. If the horses have been resident in different countries in the past 60 days for varying periods then only one horse per certificate is allowed. The horses must be on the same flight.

Name	Colour	Sex	Age	Breed	Microchip number and/or tattoo*	Passport Number*	Issuing/Validating Authority*

Either an identification silhouette or a valid identification document accompanies this horse.

SECTION II ORIGIN, TRANSPORT AND DESTINATION

(a) Exporting country/Macau⁽²⁾: _____

Competent Authority⁽³⁾: _____

(b) Name and address of consignor⁽⁴⁾: _____

(c) Address of premises where the horse was examined: _____

(d) By AIR/RAIL/ROAD/SEA*: _____

Indicate flight number, registration marks or registered name as appropriate

(e) In-transit accommodation* (name and address of premises and period held at the premises): _____

PRIOR APPROVAL IS REQUIRED FROM HONG KONG GOVERNMENT.

(f) Name and address of consignee: _____

N.B. All pages must be endorsed with the certifying official veterinarian's initials and official stamp using a different colour ink to the paper and print.
 (Version: July 2017)

* Delete as appropriate

SECTION III MOVEMENT INFORMATION

I, _____, an Official Veterinary Officer authorised by the competent veterinary authority⁽³⁾ of the exporting country/Macau to certify horses for export, hereby declare that:

- (a) The Permanent/Usual Residency⁽⁵⁾ for the horse is Hong Kong.
- (b) This horse has been temporarily imported into the country/countries/Macau listed below for racing purposes or other purposes as approved by AFCD since leaving Hong Kong according to the following sequence:
 - i. Country/Macau: _____ Entry date: _____ Exit date: _____
 - ii. Country/Macau: _____ Entry date: _____ Exit date: _____
 - iii. Country/Macau: _____ Entry date: _____ Exit date: _____
 - iv. Country/Macau: _____ Entry date: _____ Exit date: _____
 - v. Country/Macau: _____ Entry date: _____ Exit date: _____
- (c) All of the country/countries listed in SECTION III(b) are included in the list of Scheduled Countries⁽²⁾.
- (d) I have checked all certification issued for this horse since export from Hong Kong for all the countries/Macau listed in SECTION III(b).

SECTION IV ISOLATION INFORMATION IN THE COUNTRY/COUNTRIES/MACAU WHERE THE HORSE HAS TEMPORARY RESIDENCY

- (a) Based on the certification provided, during the entire period of stay in the country/countries/Macau listed in SECTION III(b) above, the horse has been held in officially approved isolation premises other than during transport between the ports of import and export and the isolation premises, and during training and racing under official supervision.
- (b) i. Address(es) of the isolation premises in the country/countries/Macau of temporary residency (list the premises for each country in SECTION III(b) above):
:

If the exporting country/Macau cannot be certified as being free of equine encephalomyelitis (all types) and screw worm, whilst the horse is temporarily resident there, then the horse must be held in mosquito and fly (vector) protected stables and treated with an effective vector repellent/insecticide on each occasion that it leaves the vector protected stables.
- ii. The premises were emptied, thoroughly cleansed and disinfected prior to the entry of the horse.
- iii. The horse has only come into contact with other temporarily exported Hong Kong resident horses. Contact with other horses is only permitted at the time of racing/competition.

SECTION V HEALTH INFORMATION

- (a) I have examined the horse identified in this certificate within 24 hours prior to export and found it to be free from clinical signs of infectious or contagious disease, free from external parasites and fit to travel.
- (b) While in this country/Macau the horse has not been mated, either naturally or by artificial insemination, or been resident on horse breeding premises for the last 60 days.
- (c) The exporting country/Macau is either African Horse Sickness (AHS) free for the last two years and no vaccination against AHS has been practiced for the last 12 months, or it has an officially recognised AHS Free Zone⁽⁷⁾. AHS is a notifiable disease in the exporting country/Macau. The horse has not been on any premises where AHS has occurred in the past 60 days and the horse has not been infected with AHS in the past 60 days.
- (d) The exporting country/Macau has been free from Venezuelan equine encephalomyelitis and glanders for the last two years and the horse has not been vaccinated against Venezuelan equine encephalomyelitis in the past 60 days.
- (e) During the entire period in the exporting country/Macau of temporary residency the horse was continuously resident on holdings which did not have any cases of the diseases listed below and did not suffer from any of these diseases.

N.B. All pages must be endorsed with the certifying official veterinarian's initials and official stamp using a different colour ink to the paper and print.
(Version: July 2017)

* Delete as appropriate

Anthrax**	Equine influenza	Scabies
Contagious equine metritis**	Equine piroplasmosis	St. Louis encephalitis
Dourine**	Equine viral arteritis	Strangles (Streptococcus equi)
Eastern equine encephalomyelitis**	Glanders**	Surra
Epizootic lymphangitis	Hendra virus infection	Venezuelan equine encephalomyelitis**
Equine ehrlichiosis	Horse mange	Vesicular stomatitis**
Equine encephalosis	Horse pox	Western equine encephalomyelitis**
Equine herpes virus (abortigenic and neurotropic) infection	Japanese encephalitis	
Equine infectious anaemia**	Nipah virus infection	

The diseases with a double asterisk (**) listed above are compulsorily notifiable in the exporting country/Macau.

SECTION VI TESTING AND VACCINATION INFORMATION ^(8&9)

- (a) Based on the certification and laboratory results provided:
- Blood samples have been taken from the horse within 14 days of export to Hong Kong.
 - The following tests were performed with **negative** results (unless otherwise stated) in each case.
- (b) No vaccines have been administered to the horse within 14 days of export to Hong Kong.
- (c) The original or certified copies of all health certificates, laboratory tests and vaccination certificates (if vaccinations are recorded in the horse's passport a certified copy of the relevant pages of the passport is **still required**) from all countries/Macau listed in SECTION III(b) have been endorsed and **must be attached** to this certificate⁽⁶⁾.
- (d) All sections must be completed by inserting a tick ✓ in the appropriate box.

i.	African horse sickness	<input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country in which African horse sickness (AHS) has been reported in the last 2 years and in which vaccination against AHS has been practiced in the last 12 months.
ii.	Dourine	<input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country/Macau where dourine has been reported the last 12 months. OR <input type="checkbox"/> The complement fixation test (CFT) on _____ ⁽¹⁰⁾ .
iii.	Equine influenza vaccination	During the 90 days immediately prior to export from Hong Kong the horse was administered: <input type="checkbox"/> A primary course of approved vaccinations against equine influenza comprising of at least 2 doses with an interval of 4 to 6 weeks or according to the terms of vaccine registration with the relevant government authority. OR <input type="checkbox"/> A booster vaccination against equine influenza which was given within 12 months of a primary course, or within 12 months of a booster vaccination where it, and any other previous booster vaccinations, had been administered annually within a regular 12-month period since the primary course or according to the terms of vaccine registration with the relevant government authority.

N.B. All pages must be endorsed with the certifying official veterinarian's initials and official stamp using a different colour ink to the paper and print.

* Delete as appropriate

iv.	Equine influenza testing	<p>A nasopharyngeal swab was collected from the horse within 48 hours prior to departure in the exporting country/Macau and was subjected to one of the following tests:</p> <p><input type="checkbox"/> A polymerase chain reaction test for influenza A on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> The Directigen Flu A or Flu A+B test kit manufactured by Becton, Dickinson and Company USA (BD) on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> The ESPLINE Influenza A and B-N kit manufactured by Fujirebio Inc. on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> Another test as approved by AFCD.</p>
v.	Equine infectious anaemia	<p><input type="checkbox"/> The immunodiffusion (Coggins) test on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> Since leaving Hong Kong the horse has only been resident in country(s)/Macau that have not reported a case of EIA in the past 2 years.</p>
vi.	Equine piroplasmiasis	<p><input type="checkbox"/> The indirect fluorescent antibody test (IFAT) for <i>Theileria equi</i> and <i>Babesia caballi</i> on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> Since leaving Hong Kong the horse has only been resident in country(s)/Macau that have not reported a case of equine piroplasmiasis in the past 2 years.</p>
vii.	Hendra virus	<p><input type="checkbox"/> No case of Hendra virus infection has been reported in the exporting country/Macau in the last 2 years.</p> <p>OR</p> <p><input type="checkbox"/> An ELISA test on _____⁽¹⁰⁾. If the ELISA test was positive then the horse was tested for Hendra virus with the VNT on _____⁽¹⁰⁾.</p> <p>OR</p> <p><input type="checkbox"/> Approved and up-to-date vaccination against Hendra virus ⁽¹¹⁾.</p>
viii.	Nipah virus	<p><input type="checkbox"/> No case of Nipah virus infection has been reported in the exporting country/Macau in the last 2 years.</p> <p>OR</p> <p><input type="checkbox"/> An ELISA test on _____⁽¹⁰⁾. If the ELISA test was positive then the horse was tested for Nipah virus with the VNT on _____⁽¹⁰⁾.</p>
ix.	Rabies	<p><input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country/Macau where rabies has been reported the last 2 years.</p> <p>OR</p> <p><input type="checkbox"/> During the last 60 days or since leaving Hong Kong, the horse has not been exposed to rabies or been on any premises with a case of rabies. The horse has either not been vaccinated against rabies or was vaccinated against rabies using an approved vaccine not less than 30 days and not more than 12 months prior to export.</p>

N.B. All pages must be endorsed with the certifying official veterinarian's initials and official stamp using a different colour ink to the paper and print.
(Version: July 2017)

* Delete as appropriate

x.	Vesicular stomatitis	<input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country/Macau where vesicular stomatitis has been reported the last 2 years. OR <input type="checkbox"/> During the last 60 days or since leaving Hong Kong the horse has only been present on premises further than 50 kilometres from a reported case of vesicular stomatitis in the last 12 months. The horse was tested for vesicular stomatitis with the virus neutralisation test (VNT) on _____ ⁽¹⁰⁾ .
xi.	Western and Eastern equine encephalomyelitis	<input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country/Macau where western and eastern equine encephalomyelitis has been reported the last 2 years. OR <input type="checkbox"/> The horse was vaccinated against Western and Eastern equine encephalomyelitis with inactivated vaccine on _____ within 6 months to 30 days prior to export. OR <input type="checkbox"/> The horse was kept in AFCD approved vector proof facilities for 21 days prior to export.
xii.	Surra	<input type="checkbox"/> The horse has not, during the last 60 days or since leaving Hong Kong, been in any country/Macau where surra has been reported the last 2 years. OR <input type="checkbox"/> The horse has been kept in vector protected facilities for 21 days prior to export or since leaving Hong Kong and was treated with an effective vector repellent/insecticide each time it left the facilities. A blood sample has been taken 10 days after the start of isolation on the _____ ⁽¹⁰⁾ and tested using an antibody-detection ELISA (if the horse remains in a surra infected country for less than 10 days an ELISA testing is not required) and microhaematocrit centrifugation technique for surra.
xiii.	Japanese encephalitis	As Japanese encephalitis is endemic in Hong Kong, importers are advised to vaccinate their horses prior to import.

(g) **Pregnancy:** The horse is not pregnant.

(h) **External parasite examination and treatment:**

i. The horse was thoroughly examined for the presence of external parasites by either an Official Veterinary Officer or a designated veterinarian within 24 hours prior to export. A systematic approach was undertaken with close examination of ears, false nostrils, under body areas (axilla, inguinal, under mandible), perineum, mane and tail.

No ticks were found.

OR

Ticks were found and all horses in the premises were immediately treated with a parasiticide effective against ticks. Subsequent re-inspection established that ticks were no longer present. The Hong Kong Government has been advised and has accepted the horse for temporary importation and the approval documentation is attached.

ii. The horse was treated with a broad spectrum parasiticide, licensed/registered for use on horses, capable of killing ticks and used according to the manufacturer's recommendations within 48 hours prior to export.

SECTION VII CERTIFICATION VALIDITY

This certificate is valid for 72 hours prior to export and until importation into Hong Kong. If a flight is delayed longer than 72 hours then re-certification is required.

SECTION VIII TRANSPORT INFORMATION [This section is to be certified either by the same official veterinarian who has certified the foregoing section or by an authorised transportation agent]

- (a) The vehicle for the transport of the horse to the port of exit was thoroughly cleaned and disinfected with an officially approved disinfectant and was treated with an officially approved insecticide to my satisfaction immediately prior to the loading of the animal.
- (b) During the transportation, after due enquiry and to the best of my knowledge the horse will have no contact with animals not of the same certified health status.
- (c) Procedures are in place to ensure that the containers that the horses will be transported in and loading facilities will be thoroughly cleaned and disinfected prior to use.
- (d) The containers meet the design and species requirements recommendations of the International Air Transport Association.

SECTION IX ACKNOWLEDGEMENT BY THE CONSIGNOR OR HIS AUTHORISED AGENT

I _____ (name) hereby acknowledge the following:

- (a) The horse must undergo post arrival quarantine (PAQ) in a Government approved quarantine premises, except during approved transport, training and competition for at least 14 days.
- (b) In the event of the horse identified in SECTION I of this certificate, arriving in Hong Kong without the correct certification or in any other way not having met these requirements, the horse and any in-contact horse or equipment may be detained in isolation, exported at the importer's expense or destroyed and disposed of at the importer's expense.
- (c) During isolation in Hong Kong the horse may be subjected to any testing or any treatment prescribed by the Hong Kong Government at the consignor's expense.
- (d) If the horse fails a test or shows signs of disease that horse and any in-contact horses may be, at the consignor's expense, detained in isolation for further testing and/or observation or exported or destroyed and disposed of without recompense.

Signature: _____ Date: _____

FOOTNOTES:

1. The language of the exporting/importing country(ies)/Macau may also be used providing that it appears below the English version on the same certification. In the event of any differences, the English version will prevail.
2. Scheduled countries for temporary import into Hong Kong: Argentina, Australia, Canada, Denmark, France, Germany, Italy, Japan, Republic of Korea, Peninsular Malaysia, New Zealand, the Netherlands, the Republic of Ireland, Singapore, the United Arab Emirates, the United Kingdom (Great Britain & Northern Ireland) and the United States of America. The Special Administrative Region of Macau is also classified as scheduled country in the context of this document.
3. Competent Authority: The government authority of the exporting country/Macau, which is responsible to issue official certification for the export of horses.
4. The consignor or his authorised agent must complete the acknowledgement (SECTION IX) attached to this certificate.
5. A Hong Kong resident horse is a horse that was previously resident in Hong Kong without quarantine restriction (imposed by AFCD) prior to export and has not been continuously out of Hong Kong for more than 60 days.
6. Certified copies may be photocopies of the original importation certification bearing the name, title, signature, date and official stamp of the official veterinarian issuing the onward certification. If copies of health certificates and/or laboratory reports are not available to the exporting country/Macau then the tests will be deemed to have not taken place and must be performed in the exporting country/Macau.
7. An official African horse sickness free zone of a country, territory or part of a territory as designated by AFCD.
8. All serological tests and vaccinations must be carried out in accordance with the latest version of the OIE Manual of Standards for Diagnostic Tests and Vaccines if OIE standards exist. The laboratory reports (or certified copies) for tests carried out must be attached to this certificate and officially endorsed by the certifying veterinarian. Proof of vaccinations must also be attached.
9. Blood samples must be sent to a laboratory approved by the veterinary authority of that country/Macau.
10. Enter date the blood sample was collected.
11. Equivac® HeV virus vaccine produced by Zoetis Australia Pty Ltd is the only available vaccine against Hendra virus and subsequently approved for use for imported horses by AFCD. Vaccines must be administered as per registration requirements and manufacturer's advice. The import must be accompanied by an up-to-date vaccination certificate endorsed by the official veterinary officer authorised by the competent veterinary authority of the exporting country/Macau.
