The Use of C-E Greenhouse in Hong Kong (2)

## From the Editor

The merits of controlled-environment greenhouses are being realized by more people and welcomed by local farmers. Locally, the number of greenhouses is increasing while more different kinds of greenhouse crops are produced in recent years. Apart from utilizing controlled-environment greenhouses to produce high-valued crops and flowers, there is also a chicken farmer to use controlled-environment greenhouses to raise chickens. Some companies, universities and schools prefer to use controlled-environment greenhouses for research and educational activities.

## Use for cultivation of different kinds of crops

Orchids

Mini cucumber

Strawberry

Golden-cap mushroom

Lily cut-flower

Rock melon

Herbs

Lingxhi

## Use for mass seedlings production and teaching activities

Seedlings production

Teaching and research

The revised procedures for application for building a controlled-environment greenhouse gives farmers the convenience and also shortens the processing time. It is hoped that more and more farmers to use the new technology of controlled-environment greenhouse for producing high-valued crops in order to improve their competitive ability.
