

齊保生物多樣性 種子來源要認清

Protect local biodiversity Plant seeds of known sources

香港法例第607章《基因改造生物（管制釋出）條例》現已生效。任何人若明知而在田間種植未獲核准的基因改造作物，即屬違法。

為了保護本地的生物多樣性，種植者應避免使用來源不明的進口農產品的種子或繁殖組織(如塊莖、根莖等)作種植用途。

The Genetically Modified Organisms (Control of Release) Ordinance, Cap.607, is now in effect. Any person who knowingly grows unapproved genetically modified crops in a field commits an offense.

To protect the local biodiversity, growers should avoid planting seeds or other propagation materials (e.g. tuber and rhizome) obtained from the imported agricultural produce of unknown sources.
