

Code for SCUBA divers and snorkellers to visit the coral sites

- 1. When a dive boat is used to transport divers to the coral sites,**
 - do not drive into too shallow water;**
 - do not anchor outside the designated anchoring area;**
 - tie up the boat to the green mooring buoy provided if necessary;**
 - dive boats should not pass over diving areas in radius of 15 meters from bubbles.**
- 2. When diving in the water, do not touch, walk, sit or lie on the coral.**
- 3. Avoid SCUBA diving training on coral sites.**
- 4. If a SCUBA diver cannot master buoyancy control, he should avoid diving on the coral site, in particular the shallow coral site (less than 2 M). However, diving along the periphery of the coral site in deeper waters is allowed.**
