

# Ho Pui Mountain Bike Trail Improvement Works (2019-2020)

Starting from 25 November 2019, this department will conduct improvement works along Ho Pui Mountain Bike Trail (between the top of Ho Pui downhill and the dam of Ho Pui Irrigation Reservoir). The works aim to reduce trail erosion and boost the enjoyment of mountain biking. This department has invited trail specialist from the International Mountain Bicycling Association to design the improvement works and provide on-site guidance; the works are estimated to complete in 1 month. Works location plan is shown below:

The improvement works at the above section of Ho Pui MBT involves excavation and the use of a small excavator. For bikers' safety sake, this department will erect notices at the entrance and other locations of Ho Pui MBT to alert bikers to be cautious of ongoing works ahead, to reduce speed as appropriate and follow site workers' direction in dismounting and push bikes passing the works site.
