

Landslide

- Landslides may occur when a large amount of rainwater has soaked a natural or artificial slope during a downpour or after days of heavy rain.

Safety Guidelines

- 👍 **Avoid** going near or staying around steep slopes during heavy rain or after a few days of heavy rain.
- 👍 The oozing out of a large quantity of muddy water from the base or the weep holes of a slope indicates that the slope is saturated with water. Exposure of inner soil and appearance of new cracks on the slope are early signs of a landslide. Keep away from such slopes.
- 👍 **Don't** proceed by stepping on loose mud if landslide blocks your way; retreat or seek another safe route to leave the scene immediately.

Emergency Measures

- 👉 **Don't** try to rescue accompany buried in a landslide. You should call for a fully equipped rescue team for help.
