

甚麼是紅潮/藻華?

What are Red Tides / Algal Blooms?

紅潮/藻華的形成是由於海水裏一些含有色素的微型浮游藻類快速地大量繁殖而引致海水變色，是一種自然現象。

- 大部份紅潮/藻華都是無害及不含毒性的。
- 漁農自然護理署在紅潮報告網絡負責協調工作。
- 如發現紅潮，請向漁農自然護理署報告或致電政府熱線。

Red tides or algal blooms are natural phenomena of discolorations of seawater caused by rapid multiplication of microscopic algae in the seawater.

- Most red tides/algal blooms are harmless and non-toxic.
- AFCD is acting as the co-ordinator of the Red Tide Reporting Network.
- If red tide is discovered, please report to AFCD or call government hotline.
